

## Press Release

MRO Europe, Barcelona, October 23rd, 2024

### Revima and Asia Digital Engineering Join Forces to Revolutionize Fleet Management with Predictive Maintenance Integration

**BARCELONA, 23 OCTOBER 2024** – Asia Digital Engineering (ADE) and Revima have formed a strategic collaboration to enhance ADE's digital fleet management platform, **ELEVADE™**, through the integration of Revima's advanced APU predictive maintenance solution, **PREDICARE**. The signing ceremony took place at MRO Europe, the premier event for the commercial aviation aftermarket.

Revima, a renowned independent specialist in Auxiliary Power Unit (APU) Maintenance, Repair and Overhaul (MRO), currently supports more than 250 aircraft globally with PREDICARE. This real-time predictive maintenance and engineering support tool is focused on providing proactive solutions to minimize downtime and improve fleet reliability.

**ELEVADE™** is an innovative all-in-one digital solution for the airline and MRO industries, the first of its kind in Asia. This platform integrates essential functions, including fleet management, aircraft health monitoring and workforce optimisation, enhancing aircraft maintenance and engineering management. Built on three pillars—**Fleet**, **People**, and the upcoming feature **Material**—ELEVADE™ currently monitors over 200 aircraft and 3,000 personnel across ASEAN, with three additional Asian airlines conducting trials to experience its benefits.

The collaboration aims to integrate PREDICARE into ADE's ELEVADE™ platform, transforming it into a comprehensive, all-in-one solution for airlines. This will enable operators to manage predictive maintenance for multiple aircraft systems seamlessly under a single unified platform, significantly improving operational efficiency and fleet oversight.

A key phase of the partnership will involve integrating PREDICARE with ADE's primary airline customer, AirAsia, across a number of their A320 fleet to ensure operational readiness. Following this trial phase, the solution will be rolled out to airline customers globally who utilise the ELEVADE™ platform, further strengthening ADE's digital service offerings.

**Vikram Singh, Director New Services in REVIMA** shared, "PREDICARE solution is a great complement to ELEVADE™ platform. It enables us to scale our reach while providing operators with an integrated, best-in-class predictive maintenance solutions for different platforms."

**Adnan Mansur, Head of Digital & Innovation Services at ADE** said "We are dedicated to driving innovation and delivering smarter, data-driven solutions to enhance fleet management. The integration of PREDICARE into ELEVADE™ marks a key milestone in realizing this vision. Through this collaboration, we are empowering airlines to harness real-time insights and predictive capabilities for improved fleet reliability and reduced downtime. We are excited about the potential this partnership brings and look forward to offering a truly unified platform for aircraft digital maintenance."
