

## Press Release

MRO Europe, London, October 14th, 2025

### Revima launches GEAR-ASSIST and OPTIPOWER

Revima, the leading independent MRO specialist with over 50 years of expertise in APU and Landing Gear, announces the launch of two new additional value services at MRO Europe. GEAR-ASSIST and OPTIPOWER are designed to enhance airline operational performance, reduce cost and improve sustainability.

**GEAR-ASSIST** delivers on-site landing gear working party support at airline premises. Leveraging over 50 years of landing gear MRO expertise and facilities in France and Thailand, specialist working parties can be deployed globally providing certified repairs, inspections, component replacements, full landing gear removal & installation solutions, and more. Capitalizing on broad aircraft capability and focus on fast customer response, the service ensures minimized downtime, and maximum operational continuity for operators.

**OPTIPOWER** offers airlines unique real-time visibility into ground electric and pneumatic service (GPU, ACU, PCA or FEGP) performance. Building on the success of Effifuel and Opticooling, which optimize APU use in real time & cabin cooling management respectively, OPTIPOWER takes aircraft power management efficiency during turn-around to the next level. Experience with our early customer airlines have demonstrated optimized ground power service use, cut fuel burn and emissions, and eliminate service billing discrepancies. The result: lower ground operations costs and improved sustainability.

Both services are available as stand-alone or integrated solutions, accessible to all operators.

Olivier Legrand, President & CEO of Revima Group, commented:

*“With GEAR-ASSIST, we bring our 50+ years landing gear expertise directly at the operator’s premises, ensuring faster return-to-service. With OPTIPOWER, we allow customers to ensure that their ground power operations are at the expected level of performance while improving sustainability.*

*Both these services reflect Revima’s continued commitment to delivering tangible, measurable value to our customers.”*
