Revima signs 131-9A APU support contract with Air Astana

REVIMA, the leading independent APU and Landing Gear MRO provider, has signed an exclusive 5-year agreement with Air Astana Group for the maintenance, repair and overhaul of their 131-9A Auxiliary Power Units.

Under this long-term contract, REVIMA will deliver comprehensive MRO services ensuring high reliability and operational performance across the airline's Airbus A320 Family fleets. All APU shop visits will be performed at REVIMA's state-of-the-art facility in Normandy, France.

As part of the agreement, Air Astana Group will benefit from REVIMA's **PrediCare®** digital predictive maintenance solution, providing best-in-class maintenance recommendations for enhanced operational planning and optimized lifecycle cost management.

"We are pleased to partner with REVIMA for the support of our APU fleet," said Keith Wardle, Vice President, Engineering and Maintenance of Air Astana. "Revima's technical expertise and the added value of the PrediCare® digital service will help us maintain the highest levels of safety and operational efficiency."

Olivier Legrand, President & CEO of REVIMA, stated: "We are honored to be selected by Air Astana Group, and we look forward to delivering tailored support, superior reliability, and additional value digital solutions throughout our partnership."
